

BRONAGH LYNCH

Consarc Design
Group

AWARD-WINNING PROJECT WORK

Bronagh is an architect and director in the Consarc Design Group specialising in conservation. This role involves managing a team of people, and a diverse range of restoration projects. Bronagh is also responsible for working with contractors and subcontractors to ensure that the projects delivered are to a high quality and exceed the client's expectations.

Bronagh has been in the industry for 21 years, having graduated with a BSc. in Architecture from Queens University Belfast. She also holds a Diploma in Advanced Architectural Studies, a Certificate in Professional Practice – RIBA Part 3, and a Diploma in Conservation.

She says “The industry is challenging and diverse at the minute but every day is different in my role. I enjoy the challenge of restoring existing buildings and bringing them back to their former glory and giving them a new lease of life. Bronagh recently completed the restoration of the Guildhall Grade A listed building in Derry / Londonderry acting as the Project Architectural Director.

The scheme has since won several awards including the RIBA Regional and Conservation Award 2014, the RSUA Conservation Award 2014, and the Irish Georgian Society Conservation Award 2014.

Now working on the construction of a new adult hospice in Belfast, Bronagh says, “There are great opportunities for women in the construction industry with many chances for specialisms and diversification so women should embrace these and be part of creating a better construction industry.”
